South Jersey Gas Application for New Construction Gas Service

RESIDENTIAL -

PLEASE NOTE: Your application for gas service cannot be processed without a <u>copy of your site or plot plan</u> that clearly shows the location of your new home on your lot.

This plan must include:

- Setback dimensions
- Gas meter location
- Any obstructions
- · Well and septic

Application for service should be submitted as soon as the foundation is complete.

Return completed application package to:

Applicant agrees to connect natural gas equipment within 90 days of meter installation. If the applicant does not, the COMPANY reserves the right to bill said applicant for the total cost of installation.

This application is neither an agreement to provide gas on the part of the COMPANY nor is it an agreement for the CUSTOMER to install appliances until the CUSTOMER receives approval from the COMPANY and the COMPANY obtains all necessary permits.

CUSTOMER is advised NOT to install natural gas appliances/equipment until approval is confirmed as outlined above.

Agreement to provide gas service is subject to the terms and conditions of the COMPANY tariff and any charges therein approved by the New Jersey Board of Public Utilities.

Thank you for your interest in natural gas. We look forward to serving you!

Following is a description of the steps necessary to install a gas service to your property:

- 1. Complete this Application for Service and return it to South Jersey Gas. Keep the customer copy for your records. You must submit a signed contract for the purchase and/or installation of natural gas equipment, demonstrating your intent to use the service once it is installed. If you are installing the equipment yourself, a letter from you listing the manufacturer, model number and a brief description of the natural gas equipment you will be installing or converting must be submitted.
- 2. The Company's acceptance of this Application for Service does not constitute an approval of the application. After reviewing your application and receipt of necessary permits, we will notify you of the approval or denial of your application.
- 3. Once your signed Application for Service and your signed contract are received, we will complete an on-site review of your requested meter location and apply for any required municipal permits to run the service. Please be advised, the municipality may deny a street opening permit. Do not install any equipment until you receive notice your application was approved.
- 4. If your heating system is being converted from oil heat, a lined chimney is required for heating and/or domestic water heater installations. All existing lined chimneys must be inspected and cleaned before natural gas service will be turned on for your home. Should your contractor fail to mention the chimney work during the bidding presentation, we advise you to remind the contractor about it.
- 5. If you are financing your equipment installation through South Jersey Gas, South Jersey Gas does not have any obligation to install your equipment prior to approval of your financing application. Please be aware, however, that in the event installation occurs prior to such approval, you will be responsible for payment to South Jersey Gas, whether or not you are approved for financing.
- 6. When all items above are completed, your service line and the South Jersey Gas meter will be installed and South Jersey Gas will begin billing you for natural gas service.

We will be pleased to answer any questions you may have to assist you with this process.
